

Banners with eyelets artwork

**Print data supply: Final format
without additions**

color space
CMYK

printer's marks
no

file format
PDF, JPG, TIF

Safety distance for eyelets 50 mm (in this area put no important text, it could be unreadable through the eyelets)

- do not use color bars, register marks, etc.
- do not create spot or special colors or alpha channels
- transparencies must be reduced
- Convert all fonts to paths / curves
- Color space: always CMYK
- Colour profile: FOGRA 27
- Total ink application: max. 300 %
- PDF files: PDF / X-3: 2002
- Do not set any areas or contours to „overprint“

Attention: If you have not selected a professional data check, all RGB data in the CMYK color space converted! We assume no liability for possible colour deviations. Please note that color renderings of non-calibrated output devices (e.g. monitor, printer) may differ significantly from the print result.
